1. INLEIDING EN DOEL VAN DIE PLAN

1.1 ALGEMEEN

Area-gebaseerde beplanning is 'n inisiatief wat die oorhoofse GOP proses komplementeer deur te fokus op gemeenskappe. Gemeenskappe in hierdie konteks word verteenwoordig deur nedersettings (dorpe) en wyke. Omdat wyke dikwels in die praktyk gemeenskappe of nedersetting geografies verdeel, het Swartland besluit om primêr op sinvolle geografiese areas te fokus. Wyksbeplanning word egter nie afgeskeep nie. 'n Aantal wyke word gekombineer vir elke dorp of groep nedersettings en gekombineer in die dokument.

Die volgende vyf beplanningsareas is geïdentifiseer:

- Noord: Moorreesburg, Koringberg en Ruststasie (Wyke 1 en 2)
- Oos: Riebeek-Wes, Riebeek Kasteel en Ongegund (Wyke 3 en 12)
- Wes: Darling en Yzerfontein (Wyke 5 en 6)
- Suid: Abbotsdale, Chatsworth, Riverlands en Kalbaskraal (Wyke 4 en 7)
- Sentraal: (Wyke 8, 9, 10 en 11 en klein gedeeltes van Wyke 4, 7 en 12).

As sulks is hierdie 'n benadering wat geïntegreerde beplanning op 'n sub-munisipale vlak aanspreek. Daar is dus vyf beplanningsareas; elk met sy eie Area Plan dokument. Vier van die vyf beplannings areas verteenwoordig twee wyke elk, terwyl Malmesbury vier wyke verteenwoordig.

Die belangrikheid van wyke en wyk-komitees word aangespreek in die tweede gedeelte van elke Areaplan. Dit bevat ook die gemeenskapsinsette en die resultate van die publieke vergaderings wat in daardie betrokke wyke gehou is.

1.2 STRUKTUUR VAN DOKUMENT

Wanneer beplanning en gemeenskapsbetrokkenheid op plaaslike vlak voorgelê word, word inligting per dorp en wyk aangebied (soos uitgespel in die vorige paragraaf).

Dit kan 'n uitdaging wees omrede dit die natuurlike vloei van 'n GOP proses vanaf gemeenskapsdeelname tot implementeringsplanne onderbreek. Nietemin, om struktuur te behou word alles wat met 'n dorp verband hou, saam gegroepeer in die dorp gedeelte, en alles wat met 'n wyk verband hou, word in die wyk gedeelte saamgevat.

1. INTRODUCTION AND PURPOSE OF THE PLAN

1.1 GENERAL

Area based planning is an initiative that complements the IDP process by focusing and zooming in on communities. Communities in this sense are represented by settlements and wards. Because wards are often demarcated in a way that divides areas that in reality represent coherent communities or settlements, Swartland decided to adopt an approach that in the first place focuses on sensible geographical areas, simultaneously considering wards so that ward planning is not neglected. To achieve this, a number of wards are combined for each area plan to echo the area-based approach in a pragmatic way.

The following five planning areas were identified:

- *North: Moorreesburg, Koringberg and Ruststasie (Wards 1 and 2)*
- *East: Riebeek West, Riebeek Kasteel and Ongegund (Wards 3 and 12)*
- *West: Darling and Yzerfontein (Wards 5 and 6)*
- *South: Abbotsdale, Chatsworth, Riverlands and Kalbaskraal (Wards 4 and 7)*
- *Central: (Wards 8, 9, 10 and 11 and small portions of Wards 4, 7 and 12).*

As such, it is an approach that represents an effort to address integrated planning at a sub-municipal level. There are therefore five planning areas; each with its own Area Plan document. Four of the five plans represent two wards each, while Malmesbury town represents four wards.

The importance of the role of the wards and ward committees is addressed in the second section of each Area Plan. It also contains the community inputs and the results of the public meetings pertaining to those wards

1.2 STRUCTURE OF DOCUMENT

As mentioned in the previous paragraph, when presenting planning and community participation at local level, one has to present information per town and per ward.

This can be challenging as it interrupts the natural flow from analysis and community participation towards projects. To maintain clarity, however, everything that can be linked to a town was grouped in the town section, and everything linked to a ward approach, is presented in the ward section.

1.4 Deelnameproses 2011

Die Munisipaliteit in samewerking met die wykskomitees het begin met die samestelling van die areaplanne wat al 12 wyke dek. Vanaf 24 tot 27 Oktober 2011 is vergaderings gehou met al 12 wyke om hulle kwessies en 5 top prioriteite te bepaal. By die vergaderings is die eerste konsep van die Areaplan aan die wykskomitee lede uitgedeel om insette te lewer.

Die areaplanne is gefinaliseer tydens 'n tweede reeks vergaderings met wykskomitees, hierdie keer uitgebrei om mense van die sektore wat wykskomitee lede verteenwoordig in te sluit, tussen 27 Februarie en 5 Maart 2012.

Die rol van die wyke en wykskomitees is ingebou in die proses, aangesien die tweede gedeelte van elke areaplan die wykskomitee lede en die beplanning waarby hulle betrokke was verteenwoordig. Dit sluit ook die gemeenskappe se insette in asook die uitslae van die publieke vergaderings wat betrekking het op daardie wyke.

1.5 Deelnameproses 2012

Die konsep areaplanne is gedurende Januarie tot Maart 2013 voltooi. Die areaplanne is aan die Uitvoerende Burgemeesterskomitee op 20 Maart 2013 en aan die Raad op 28 Maart 2013 voorgelê vir oorweging.

Die konsep areaplanne is publiek gemaak op 3 en 4 April 2013 en die gemeenskap is uitgenooi om vertoë te rig.

Die areaplanne is aan die Uitvoerende Burgemeesterskomitee op 16 Mei 2013 voorgelê en aan die Raad op 30 Mei 2013 vir finale goedkeuring.

1.6 Deelnameproses 2013

Vergaderings is met al 12 wykskomitees gehou rakende die vyf areaplanne. Afskrifte van die nuutste areaplanne was aan alle wykskomitee lede gegee om hulle insette ten opsigte van die plan te lewer.

Die konsep areaplanne is aan die Raad op 27 Maart 2014 voorgelê vir oorweging.

Die areaplanne is aan die Uitvoerende Burgemeesterskomitee op 15 Mei 2014 voorgelê en aan die Raad op 29 Mei 2014 vir finale goedkeuring.

1.4 Participation process 2011

The Municipality together with the ward committees commenced with the compilation of the area plans covering all 12 wards. From 24 to 27 October 2011 meetings were held with all 12 ward committees to determine their issues and top five priorities. At the meetings the first draft of the area plans were also handed out to ward committee members to provide input into the document.

The area plans were finalised at a second series of meetings with ward committees, this time extended to include people from the sectors which ward committee members represent, between 27 February and 5 March 2012.

The role of the wards and ward committees is built into the process, as the second section of each area plan presents the ward committee members and the planning they have been involved with. It also contains the community inputs and the results of the public meetings pertaining to those wards.

1.5 Participation Process 2012

The draft area plans were completed during January to March 2013 and were submitted to the Mayoral Committee on 20 March 2013 and to the Council on 28 March 2013 for consideration.

The draft area plans were made public on 3 and 4 April 2013 and the community was invited to submit representations

The area plans were submitted to the Mayoral Committee on 16 May 2013 and to the Council on 30 May 2013 for final approval.

1.6 Participation Process 2013

Meetings were held with all 12 ward committees regarding the revision of the five area plans. All ward committee members were given copies of the most recent area plans to provide input into the document.

The draft area plans were submitted to the Council on 27 March 2014 for consideration.

The area plans were submitted to the Mayoral Committee on 15 May 2014 and to the Council on 29 May 2014 for final approval

2 DORPE EN NEDERSETTINGS IN AREA

2.1 RIEBEEK-WES

(a) Historiese agtergrond van Riebeek-wes en Riebeek Kasteel

Die Riebeek Vallei is in 1661 deur 'n Europese ekspedisie ontdek op hul roete na die noorde op soek na goud. Die area is bewoon deur die Sonquas, wat jagters was, en Khoikhoi wat veeboere was. Met die vestiging van Hollandse vryburger boere om die Kaap was daar toenemende konflik tussen die oorspronklike inwoners van die gebiede en die nuwe vryburgers.

Willem van der Stel, seun van Simon van der Stel, wat in 1699 Goewerneur van die Kaap geword het, het 'n nuwe area gevestig (wat die Riebeek Vallei en Tulbagh insluit) en het die streek "Die Land van Waveren" genoem. Baie van die plase wat in die tyd gevestig is bestaan vandag nog en sluit in Kloovenburg, Allesverloren, Sonquasdrift en Vlysbank (nou Du Vlei).

Baie van die boere wat hier gevestig het was Hugenote wat begin het met die aanplant van wingerde teen die voet van die Kasteelberg tesame met koring en ander vrugte gewasse. Deur die jare het die vallei gegroei met Riebeek Kasteel as kommersiële en vervaardigingskern wat boere bedien het en die vestiging van die afgetrede boere hoofsaaklik in Riebeek-Wes. Voorbeelde van 'n welvarende gemeenskap van vroeë tye kan steeds waargeneem word in die Victoriaanse boustyl en prag van die ouer huise veral in Riebeek-Wes.

In 1929 het 'n tak-lyn van Hermon na Porterville geopen met stasies by beide Riebeek Kasteel en Riebeek-Wes (op 'n gereelde basis neem die lyn slegs vrag vervoer tot sover as PPC). Dit het die vallei meer toeganklik gemaak vir boere om hul produkte na die markte te vervoer en ook vir mense om tussen die Kaap en die vallei te beweeg.

Riebeek-Wes is verder uniek deurdat twee bekende Suid Afrikaanse politici hier gebore is. Jan Smuts 'n veldmaarskalk, politikus en filosoof, is in 1870 op die plaas Ongegund gebore. Die skuur wat omskep is in 'n huis deur sy ouers, waar hy ook dan gebore is, dien vandag as 'n museum. Dit is geleë op die gronde van die PPC myn te Ongegund. In 1874 is een van Suid-Afrika se Eerste Ministers by name van D.F. Malan te Allesverloren gebore, met die familie wat tot vandag toe nog die plaas besit.

Hierdie twee skilderagtige dorpe is aan die voet van die Kasteelberg teen die agtergrond van wingerde, olyfbome en historiese geboue (geboorte plek van twee voormalige Eerste Ministers van Suid-Afrika) geleë. Die dorpe het 'n landelike karakter en die mooi omgewing dra by tot hul gewildheid as bestemming vir afgetredenes en toeriste (veral as naweek- en vakansiewonings).

2 TOWNS AND SETTLEMENTS IN THE AREA

2.1 RIEBEEK WEST

(a) Historical background of Riebeek West and Riebeek Kasteel

The Riebeek Valley was discovered in 1661 by a European expedition on their route to the north in search for gold. The area was inhabited by the Sanquas, which were hunters, and Khoikhoi who were cattle farmers. With the establishment of Dutch Vryburgers around the Cape, there were growing conflict between the original residents of the area and the new free burghers.

Willem Van der Stel, son of Simon van der Stel, who became governor in 1699 established a new area (which included the Riebeek Valley and Tulbagh) which he called the "Land of Waveren", some of the farms that were established in the following years are still in existence today. These include Kloovenburg, Allesverloren, Sonquasdrift and Vlysbank (now Du Vlei).

Some of the first farmers that settled here were Huguenots. This led to the early establishment of vineyards along with wheat and other fruit crops. The valley grew throughout the years with Riebeek Kasteel as commercial and manufacturing core which served farmers and the establishment of retired farmers mainly in Riebeek West. Examples of a thriving community of early periods can still be seen in the Victorian architectural styles and beauty of the older houses in Riebeek West.

In 1929 the railway line from Hermon to Porterville was opened with stations at both Riebeek Kasteel and Riebeek West (on a regular basis this line now only takes freight traffic as far as PPC). This made the valley more accessible for farmers to transport their products to the markets and also for people to move between the Cape and the valley.

Riebeek West is unique in that two famous South African politicians were born here. In 1870 politician, field marshal and philosopher, Jan Smuts, was born on the farm Ongegund. The barn on the farm was converted into a house where Jan Smuts were born. Today the Barn is a museum on the property of PPC mines. In 1874 one of South Africa's Prime Ministers, D.F. Malan, was born on the farm Allesverloren. Today his family still owns the farm.

These two picturesque towns are situated at the base of the Kasteelberg, against the backdrop of vineyards, olive trees and historical buildings (birthplace of two former prime ministers of South Africa). The towns have a rural character and the beautiful environment contributes to their popularity as retirement and tourist destinations (especially as weekend and holiday homes).

2.2 Ontwikkelingsperspektief van Riebeek-Wes & Riebeek Kasteel

Agri-toerisme vervul 'n toepaslike rol in hierdie opsig. Eiendomspryse neem toe as gevolg van 'n groeiende aanvraag na residensiële eiendomme. Die twee dorpe behou hul oorspronklike funksie as landbou-dienssentrums, maar 'n groot aantal van die huidige inwoners werk in Kaapstad. Die unieke karakter en kwaliteit van die omgewing skep 'n gewilde bestemming vir kunstenaars, terwyl inwoners oor naweke 'n ontspanne en rustige leefstyl geniet. 'n Bepaalde plek-identiteit word deur al hierdie faktore aan die Riebeek Vallei verleen.

Die PPC-sementfabriek is naby Riebeek-Wes geleë wat tot 'n mate 'n myn- en verwante kommersiële omgewing daarstel. Die industriële en kommersiële sektore word egter nie gesien as bepalend vir die toekoms van die dorpe nie, maar wel toerisme en om 'n heenkome vir afgetredenes te skep. Groeipotensiaal moet in die konteks van 'n goedbeplande en beheersde groei model ontwikkel word om die residensiële (aftree) en agri-toerisme (wyn en olywe) funksies van die Riebeek Vallei dorpe uit te bou. Infrastruktuur en dienste sal in die proses opgegradeer en uitgebrei moet word ten einde die verwagte groei te absorbeer.

Die dorpe se ontwikkelingspotensiaal word as "laag" geklassifiseer (gelys 94ste en 95ste, onderskeidelik), maar hul unieke plek-identiteite beklemtoon hul residensiële en toerisme kenmerke. Die behoeftevlakke in beide dorpe is relatief laag en die aanbevole investeringsprioriteit is daarom "bykomende infrastruktuur" (moontlik met sosiale kapitale ondersteuning).

(c) Dienste: Kapasiteit en agterstande

Riebeek-Wes

Elektrisiteit

Eskom is die Elektrisiteit voorsieningsowerheid in Riebeek-Wes met die uitsondering van die PPC woongebied. Die Swartland GOP dui daarop dat daar onvoldoende straatligte in Riebeek-Wes voorkom.

- PPC dorp netwerkkapasiteit vir ontwikkeling is beperk
- Straatverligting is onvoldoende

2.2 Development perspective of Riebeek West & Riebeek Kasteel

Agri-tourism fulfils an appropriate role in this regard. Property prices are escalating as a result of the growing residential demand. The two towns still hold to their original function as local agricultural service centres, but a substantial number of the present inhabitants work in Cape Town. The unique character and the quality of the environment create a popular destination for artists, while residents relax over the weekends enjoying the tranquil lifestyle. All these factors endow Riebeek Valley with a distinctive local place identity.

The PPC cement factory is situated close to Riebeek West and generated to some extent a mining and related commercial setting. However, the future of the towns is not regarded as being vested in industrial and commercial sectors, but rather in tourism and to provide a haven for the retired. Growth potential should be balanced in the context of a well-planned contained growth model to fulfil the residential (retirement) and agri-tourism (wine and olives) functions of the Riebeek Valley towns. In the process infrastructure and services will have to be upgraded and extended to absorb the expected growth.

In terms of development potential, the towns are ranked "low" (ranked 94th and 95th respectively), but the unique place identities emphasizes their residential and tourism features. The needs levels in both villages are relatively low and the suggested investment priority is therefore "minor infrastructure" (perhaps with minor social capital support).

(c) Service: Capacity and backlogs

Riebeek West

Electricity

Eskom is the main supplier of electricity in Riebeek West with the exception of the PPC residential area. The Swartland IDP points out that there is insufficient street lighting in Riebeek West.

- *PPC town's network capacity for development is limited*
- *Street lighting is inadequate*

Riool

- Spoelrioolstelsel is beperk tot sekere gedeeltes van die dorp en moet uitgebrei word
- Rioolwerke word tans opgradeer

Strate

- Agterstand met herseëlprogram met 'n gepaardgaande agteruitgang van padinfrastruktuur

Sewerage

- *Sewage system is limited to certain areas of the town and should be expanded*
- *Sewage works is currently being upgraded*

Streets

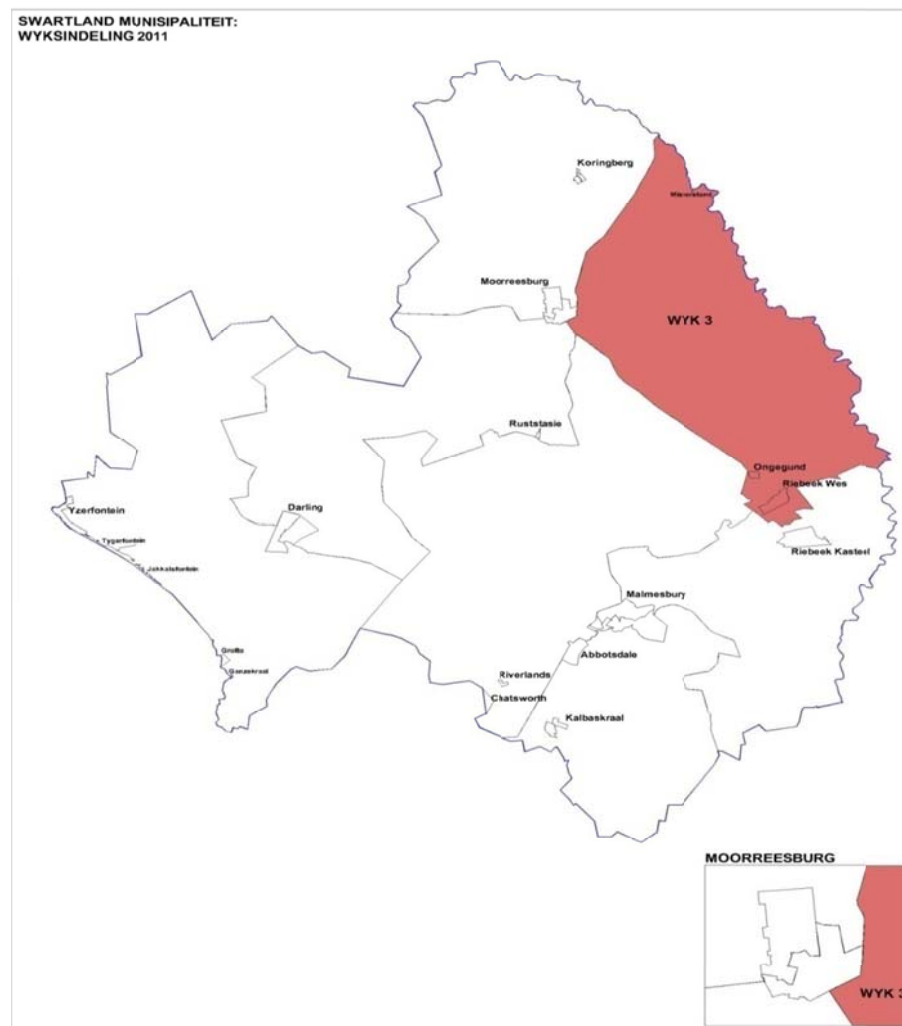

- *Backlog resealing program coupled with deterioration of road infrastructure*

Publieke Persepsie-opname

'n Publieke persepsie-opname is gedurende Oktober en November 2013 onder die leiding van Professor De Wet Schutte van UniSearch Navorsing Konsultante gedoen. Die proses het op 9 Oktober 2013 begin toe 15 munisipale amptenare opgelei is deur Prof Schutte om as fasiliteerders op te tree. Dit is gevolg deur 'n demonstrasie fokusgroepsessie met raadslede wat gefasiliteer is deur Prof Schutte. Die doel van hierdie sessie was om die metode bekend te stel aan raadslede en om as 'n leerervaring vir die 15 amptenare te dien.

Die munisipale gebied is in 10 teikengebiede verdeel. Fokusgroep-onderhoude is in hierdie gebiede met lede van die algemene publiek gehou. Hierdie opname is doelbewus nie gemik op die gemeenskapsleiers nie, maar op die gewone mans en vroue in die gemeenskap – mense wie se opinie selde gehoor word. Die fokusgroepsessies is met die volgende groepe in elk van die 10 teikengebiede gehou:

- Mans 18 -35 jaar
- Vroue 18 – 35 jaar
- Mans 36 jaar en ouer
- Vroue 36 jaar en ouer

In 'n paar gevalle waar omstandighede dit anders bepaal het, is geslag en ouderdomsgroepe saamgevoeg. Data-insameling is voltooi tussen 14 Oktober en 7 November 2013. Fasiliteerders het van aangesig tot aangesig kontak gehad met 173 persone vanuit alle vlakke van die gemeenskap. Indien hierdie syfer vermenigvuldig word volgens die groep dinamiese beginsel waar elke persoon gemiddeld vyf ander individue se menings verteenwoordig, kan dit gestel word dat die opname 'n totaal van ongeveer 865 menings van die verskillende gemeenskappe in die Swartland verteenwoordig

Twee indekse is gebruik. Die prioriteit of P-indeks bepaal die prioriteit van die kwessies wat in die fokusgroepsessies deur die deelnemers genoem is. Dit meet die belangrikheid van die kwessies en die vlak van tevredenheid met die kwessies op 'n skaal van 1 tot 11. Die prioriteit is bepaal deur die veskil te meet tussen die tevredenheid gradering en die belangrikheid gradering. 'n Kwessie wat as belangrik beskou is deur deelnemers, maar waar die vlak van tevredenheid met die kwessie ook hoog is, sal dus 'n laer prioriteit hê as 'n probleem met dieselfde belang, maar 'n laer vlak van tevredenheid.

Hoë belangrikheid, hoë ontevredenheid: Prioriteit hoog

Hoë belangrikheid, hoë tevredenheid: Prioriteit laag

Die Gemeenskap of G-indeks is 'n grafiese voorstelling van die vlak van tevredenheid van die respondent met die basiese boustene van 'n gesonde gemeenskap. Dit is skuiling / behuising, gesondheidsorg, sanitasie, water, kos, energie / elektrisiteit, inkomste / toegang tot inkomste, opvoeding, ontspanning, omgewing, godsdienste, welsyn, vervoer en veiligheid. Die items is gemeet op 'n skaal van 1 tot 11 in terme van slegs die tevredenheidsvlak en die resultaat is aangebied as 'n gemeenskap-profiel.

Die Gemeenskap of G-indeks het ook die samehorigheid of binding binne 'n gemeenskap gemeet. Die deelnemers is gevra om die drie onderstaande vrae op 'n skaal van 1 tot 11 te meet:

- Tot watter mate beskou jy hierdie gemeenskap as jou tuiste?
- Hoe naby of ver voel jy van jou vriende in hierdie gemeenskap?
- Tot watter mate kan jy staatmaak op die res van jou gemeenskap om jou te help sou jy 'n probleem het?

Die inligting van die G-indeks is noodsaaklik vir enige inisiatiewe vir volhoubare ontwikkeling. Dit dien as 'n vertrekpunt waarvan die impak of enige verandering in die gemeenskap se dienslewering en / of enige intervensieprogramme in die gemeenskap gemonitor kan word. Die geldigheid en betroubaarheid van insigte wat verkry is tydens die oefening moet nie onderskat word nie. Die werklikheid is dat die opname die Munisipaliteit met groot detail oor die werklike behoeftes van die verskillende gemeenskappe in Swartland voorsien het

Die volledige verslag sal teen 30 Junie 2014 aan wyke beskikbaar gestel word.

Public Perception Survey

A public perception survey was done under the guidance of Professor De Wet Schutte from UniSearch Research Consultants during October and November 2013. The process started on 9 October 2013 when 15 municipal officials were trained by Prof Schutte to act as facilitators. This was followed by a demonstration focus group session with councillors that was facilitated by Prof Schutte. The purpose of this session was to introduce the methodology to councillors and to serve as a learning experience for the 15 officials.

The municipal area was then divided into 10 target areas. Focus group interviews were conducted in these areas with members of the community. This survey was intentionally not aimed at community leaders but at ordinary men and women in the community – people whose opinions are seldom heard. Focus group sessions were held with the following groups in each of the 10 target areas:

- Men 18 – 35 years
- Women 18 – 35 years
- Men 36 years and older
- Women 36 years and older

In a few cases where circumstances dictated otherwise, gender and age groups were combined.

Data-collection was completed between 14 October and 7 November 2013. Facilitators had face-to-face contact with 173 persons from all levels of the community. If this figure is multiplied according to the group dynamic principle where each person represents an average of five other individuals' opinions, it can be stated that the survey represents a total of approximately 865 opinions from the different communities in Swartland.

Two indexes were used. The Priority or P-Index determines the priority of the issues mentioned in the focus group sessions by participants. It measures two things on a scale of 1 to 11: the importance of the issues and the level of satisfaction with the issues. The priority is determined by subtracting the satisfaction rating from the importance rating. An issue which is regarded as important by the participants but where the level of satisfaction with the issue is also high, will therefore have a lower priority than an issue with the same importance but a lower level of satisfaction

High importance, low level of satisfaction: Priority high

High importance, high level of satisfaction: Priority low

The Community or C-Index is a graphic representation of the level of satisfaction of the respondents with the basic building blocks of a healthy community. These are shelter/housing, health care, sanitation, water, food, energy/electricity, income/access to income, education, recreation, environment, religion, welfare, transport and safety. The items were measured on a scale of 1 to 11 in terms of satisfaction level only and the result was presented as a community profile.

The Community or C-Index also measured the cohesion or bonding within a community. Participants were asked to rate the following three questions on a scale of 1 to 11:

- To what extent do you consider this community to be your home?*
- How close or distant do you feel to your friends in this community?*
- To what extent can you rely on the rest of your community to come to your aid if you would have a problem?*

The information of the C-Index is essential for any sustainable development initiatives. It serves as a point of departure from which the impact of any change in the community's service delivery and/or any intervention programmes in the community can be monitored.

The validity and reliability of insights obtained during the exercise should not be underestimated. The reality is that the survey provided the Municipality with great detail about the real needs of the different communities in Swartland.

The complete report will be made available to ward committees by 30 June 2014

Gemeenskap Indeks / Community Index

- Dit is belangrik om daarop te let dat hoe smaller die sirkel hoe beter die kohesie in 'n gemeenskap /
- *It is important to note that the narrower the circle is the better the cohesion within a community*
